

## LEARN ABOUT EXTRATERRESTRIALS

For most of us, the contemplation of the cosmos and what lies within are much more than a religious experience. It is about our attempt to understand our connection with and our nature of being a multidimensional being. We will never really know the true extent of this concept, but we have to begin the journey somewhere and here is as good of place as any to begin.

While many individuals would welcome the discovery of extraterrestrial life and the chance to learn more about them, such a discovery may be perceived as strange or frightening by the general public at large. While many individuals may openly welcome extraterrestrials and via the conclusion that they may be technologically superior, expect some influence to provide us with solutions to our current dilemma's such as over population, climate change, diseases, or inequalities. Some religious aspects may regard them as gods. But many others would be afraid Extraterrestrials may have a malevolent agenda to take over Earth and enslave us. Whichever attitude prevails likely will depend on what type of behavior we recognize in the extraterrestrials as being like our own.

We are only beginning to understand the staggering variety of behaviors on our own planet, so if we venture into an inhabited universe, we are likely to run into beings that evolved entirely under different physical and physiological circumstances and therefore, we may have no comprehension of their mannerisms and behaviors.

What we do know after six years of study is that Extraterrestrial's by and large, adhere to five key premises.

*Premise One core belief: Extraterrestrial's believe this makes them intellectually superior to us.* This comes with the assumption that we humans are not privileged observers of the Universe, therefore we do not understand how things work.

Everything is energy. Energy is infinite, never dies and only converts or transforms; and therefore, the universe exchanges both matter and energy with the boundary, multi-verse, and other dimensional spaces in the continuing, evolutionary cycles of past, present, and future. Everything they do is based on the intelligent energies and they recognize that behind all happenings exists the world of these energies. Energy manifests, stores and retrieves meaning in all realities by projecting certain frequencies which create dimensional living patterns, or holograms, where all the pieces and parts contain the information of the whole. The emphasis of everything Extraterrestrials do is based on the intelligent energies and they recognize that behind all happenings exists the world of these energies.

Premise 2: Extraterrestrial's call them the "Equitable Laws of the Universe". These forty-two Universal Laws are necessary to allow all the processes of the universe to function. There is a hierarchy that exists between the Laws that determines the amount of information and processes that each law manages and exist to provide order. As part of their core premise, they believe that these laws account for the way in which energies function and therefore how they function. Different species may perceive some different or unique interpretations of these Laws within their cultural digest, but when it comes to their knowledge of energy, they believe pretty consistently in the same terms, functionality, and interpretation of these laws. Humans believe somewhat the same, but we attribute our knowledge to physics, instead of realizing that the physics is still subject to these laws at the knowledge

*Core Premise 3: Consciousness:* The sentience or awareness of internal and external existence of all things. It is the state of consciousness in which they transcend the normal thought processes of mind centric thoughts and acquire knowledge through non-physical means or psychic mechanisms and pass that knowledge throughout the Universe. They believe they are One with the conscious mind of Source.

Consciousness is the fulfillment of the Universal Laws and in doing so it is a necessary component to understanding and perceiving every aspect of existence. Understand that there is no biological role to consciousness. It exists whether we have a biological body or not. Consciousness is not tied to or bound to time and space.

Consciousness surpasses everything that can be imagined and yet is already known. They believe the very existence of All is pervading all atoms of the cosmos and that there exists an encompassing all, through which everything is connected with each other in the Universe. While they tend to call it the matrix, they believe this consciousness forms part of an infinite consciousness, that they call Source. Their understanding is:

What we think and how we behave is a rate of frequency. If we change how we think and behave by becoming more aware, we raise our frequency. Increasing energy through the intentional connection with higher frequencies is what changes the rate of vibration. Access to higher frequency is how one accesses higher intelligence which are levels of higher operating sentience. Expanding Consciousness goes beyond acquiring mental knowledge in Linear Thinking and into the realm of direct cognition and higher sensory perceptual experiences. Expanding Consciousness allows one to perceive things as they really are and not what one wishes them to be.

*Core Premise 4:* Premise number four accounts for behaviors, cultural biases, and ownership. This not only applies to material things, but it also applies to ideologies and this is their core driver. You are one of the billions of people on our Earth. Our Earth orbits the Sun in our Solar System. Our Sun is one star among the billions in the Milky Way Galaxy. Our Milky Way Galaxy is one among the billions of galaxies in our Universe. You are unique in the Universe! NOTHING about you, your birth, including timing and location, has ever been random. All energy is made up of partiki particle units that are encoded with keylonta and conscious codes that are your true eternal energetic Cosmic identity throughout all space and time. Remember, we have to go back to the premise that everything is energy. You have an energetic signature that provides important information about you from an energetic perspective (Eternal Universe Aspects) rather than a DNA perspective (small phylogenic group aspects). Lineage is a cardinal component to the continuation of species. Our energetic lineage has everything to do with root races, and root races have everything to do with their mindsets, frame of reference, and ideologies. Many Extraterrestrials believe they belong to one of the root races, therefore they are entitled to or have ownership over planets, the species upon those planets, various regions of the cosmos, and dimensions.

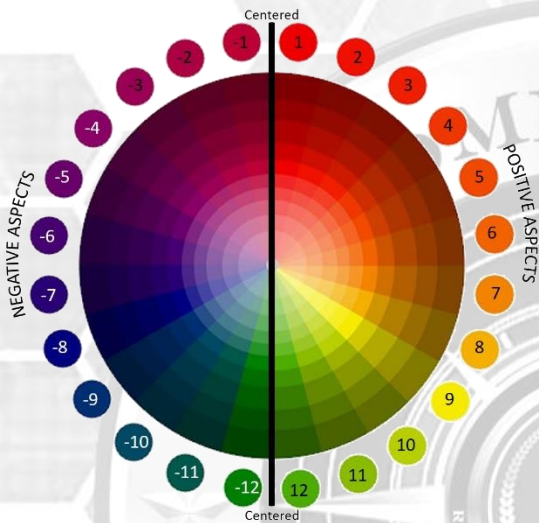

*Core Premise 5:* An–Ne’-Yao-Mah’, the ancient language of” the One” or symbolizes the timeless infinite energy of eternal existence and creation.

Extraterrestrials know this “One” as The Universal Source or Source. The Law of One is the Universal principle that refers to the conscious awareness and actions, that govern the conduct of every being. This force of comprehension holds an individual accountable for their actions as it influences the energies and creates a potential. This force of Creation is precise and upheld throughout all time, space, and dimensions, throughout all energy, all power, all materials, both individually and collectively, both seen

and unseen, from the microscopic to the macroscopic and is perceived as the result of Universal Conscious Awareness. The Law of One is the trinity aspects of consciousness governed by the eternal truth (or what is known as the Equitable Laws of the Universe), unconditional love (the first principle of energy), and service to others (even if that service is to their own hive).

### Spectrum of Energetic Aspects

Next we have to understand how they perceive things. They do this through what is called the Spectrum of Energetic Aspects.

Perception: The state of being or intuitive understanding and insight of becoming aware of something through the senses. Extraterrestrials believe there is a balance that must be maintained in the Universe. This is the basis for the way in which they perceive things.

Throughout the infinite, the forces are in a perfect balance, and hence the energy of a single thought has an influence upon the Universe.

All energies come in pairs – Yin and Yang, positive and negative, masculine and feminine, etc. When everything is balanced, then there is harmony. When everything is out of balance there is chaos and an

illusion of reality. Most Extraterrestrials have a whole spectrum of psychic capabilities that are attuned to or in alignment with the spectrum of energetic aspects.

Most Extraterrestrials have very little, if any, concept or understanding of morality, greed, corruption, deceit, fraud, etc. These actions are outside the natural imperatives. So it comes down to the way in which we judge their actions.
