

THE REALM OF UNIVERSAL SYNCHRONIZATION

The Synchronotron system, inclusive of the Holomind Perceiver, is among the Highest intelligence for physical beings. It contains doors upon doors of entry to the numerous levels of knowledge and codes.

The purity of the Cube is the purity of the consciousness of divine essence. This is your consciousness, the cube is the reflection of its intrinsic purity. This exercise is intended to entrain your mind into the cube matrix and with concentration much will be revealed to you.

441 Cube Matrix and the Master Cube 1.3.3.1 Order of Fourth Dimensional Time.

Prophecy is a function of a mathematically structured order of consciousness whose prime method of organization is a matrix of 21 x 21. Investigation of the interrelationships of the number sequences within the various overlays of this matrix as they describe different dimensions of reality and states of mind within the synchronic order define the process of consciousness.

The 441 cube matrix of 21 X 21 is considered to be the minimal fractal order to represent the unity of totality. For practical purposes this means any number can be located on the 441 matrix, even if it is greater than 441. The number 20 is considered the *factor of totality*, while $20 + 1$ or 21, is the *unity of totality*. 41, as noted, the difference between 400 (20 squared) and 441(21 squared), is called the *interval of Time*. So 441 is the matrix of the unity of totality.

For any number greater than 441, divide that number by 441, the remainder should be 441 or less and will be the base matrix unit (BMU) of that number. Or if it is a number over 9261 (21 cubed) you can divide

41	40	39	38	37	36	35	34	33	32	31	30	29	28	27	26	25	24	23	22	21

the number by 9261, or multiples of 9261. The remainder will give you either a number less or more than 441. If it is more than 441 but less than 9261, than that is the 1.3.3.1 cube index of that number, i.e., indicating its location in the 21 x 21 x 21 cube or 21 layers of 441. You then divide that number by 441 and get your BMU.

Let us take the numbers of the psi bank for example and see how the prime factor of 79 is the noosphere constant.

The number of psi chrono units in one psi bank plate (the foundational structure of the noosphere) is 520, that is, 260 units for the northern hemisphere and 260 for the southern. $520 - 441 = 79$. That qualifies 79 as the base

matrix unit (BMU) for the noosphere, or the noosphere constant. There are four such plates that govern the noosphere: $520 \times 4 = 2080$ psi chrono units that constitute the noosphere psi bank.

To demonstrate the consistency of the noosphere constant, let us find the BMU for 2080.

441 goes into 2080 four times - $441 \times 4 = 1764$. Then subtract 1764 from 2080, the result = 316, or 79×4 . Hence, the BMU in the 441 matrix for 2080 is 316. The position of 316 in the base matrix is coordinate Vertical 12 (V12) Horizontal 17 (H17). In the Holomind perceiver matrix codes, this 316 (79×4) position falls precisely on the 79th UR Harmonic rune, whose significance is "Tree of cosmic fire generates planet mind." In other words it is the 79th rune that specifically denotes the noosphere whose BMU is 79! (Note, as will be detailed in time, there are six new rune strands with 48 new UR runes, whose numbering runs from 65 to 112, and which code the corpus callosum of the Holomind perceiver, itself a function of the 441 matrix).

One other note: On the 13 Moon calendar, October 24, Self-existing Moon 7, is the 91st day of the solar-galactic year and also known as a "noospheric pause." This means the exact 79 year interval between the economic crashes occurred on 91st day, the first of the four days that mark a noospheric pause in the 13 moon calendar (the other days are the 182nd, the 273rd and the 364th, all 91 days apart). The sum of the four noospheric constants occurring at each of these 91 day interval pauses = $316 (79 \times 4)$, 316 being the total psi bank base matrix unit.

The crash of the world markets on October 24, 2008 and the beginning of the sustained world recession, 79 years to the day to the famous 1929 crash, was truly a message of the Noosphere occurring during the first noospheric pause of the 13 Moon year. Time is up for the 12:60! This is the message of the noosphere. Time to move forward mentally and spiritually and evolve our intelligence, our logic and our awareness.

We might next examine some features of the number of the noosphere constant, 79. Why 79? First of all it is a prime number. It is $78 + 1$. ($1 + 2 + 3 \dots + 12 = 78$) + 1 or ($13 \times 6 = 78$) + 1. According to Rashad Khalifa, there are 79 mystic—al-muqattat—letters prefacing 29 (of 114) suras of the Quran (he counts the NuN of Sura 68 as two letters). The kin number equivalent 79, is Blue Magnetic Storm, solar seal code 19, Wavespell 7, 19 and 7 being the two key numbers coding the Quran and the Harmonic Module (Tzolkin). In the vigesimal code, 79 is written $3.19 = 60 (3 \times 20) + 19$. And in simple numerology, $79 = 7 + 9 = 16 = 1 + 6 = 7$.

Taking Kin 79, Blue Magnetic Storm to represent the Noospheric frequency, and the Storm wavespell as the wavespell of the noosphere—wavespell of regeneration—it is especially significant that it is also the seventh wavespell, for seven is the number of cosmic creation. Note also that the kin numbers of the seventh wavespell run from 79—noosphere constant—through 91, number of the noospheric pause.

Taking the wavespells as an evolutionary/planetary sequence, note the progression of the first six wavespells: GK Neptune (Dragon), SP Maldek (Wizard), GK Earth (Hand) and GK Pluto (Sun) (Red Castle). Then come the two Martian wavespells: SP Mars (Skywalker) and GK Mars (World Bridger). While the Red Castle establishes the Alpha (Dragon 1) and Omega (Sun 20), between them being the Maldek Wizard's redemption, and the galactic karmic Earth to be redeemed, the second Castle establishes the Martian prophecy and disorder that preceded civilization on Earth, followed then by the second Plutonian wavespell, SP Pluto (Storm). The regenerative Plutonian wavespell, is then succeeded by the second (SP) Earth Wavespell, the Human.

This means that the advent of the noosphere (Storm wavespell 7) is the redemption of the Martian karma now playing out on the world stage (both Barak Obama and John McCain are 4 Skywalkers—as is Bill Clinton). Once the noosphere is established, then the genuine Human, (wavespell eight) may be established on Earth.

The noosphere constant, 79, also has its relation to the biomass constant 73: $73 \times 5 = 365$, there are 73 chromatics per solar orbit and 73 260-day cycles per 52 solar rings-Sirius B cycles, or one solar galactic cycle.

In relation to the Biomass constant the noosphere constant represents an increase of a frequency of 6. Note the features of number 6— $1+2 \dots +6 = 21$, base factor of the 441 matrix. There are 21 possibilities to a throw of the dice, six being the number of the sides of a cube, the perfect primary geometrical form; while six also refers to the allegorical six days of creation.

Also in regard to the numbers 73 (biomass constant) and 79 (noosphere constant) in relation to the supreme master bio-solar telepath, Pacal Votan, it is worth mentioning that the sections that deal specifically with him in the Telektonon prophecy, Section XI (The Prophecy of the Seven Generations) ends with verse 73, and Section XII (Time's Special Witness) ends with verse 79 (as noted above).

While the 73rd 52 year cycle (long count 1366560 to 1385540), coincides with Pacal Votan's supreme moment of supermental synchronization with the solar logos, hence establishing the biosphere as a function of the solar ring, the 79th such cycle (long count 1499420 to 1518400) begins in 995, just four years before Quetzalcoatl's departure across the Eastern Sea, prophesying his return. The end of the 79th cycle in the year 1047—time of the rise of the Ife civilization in Nigeria - occurs at the 20-year mark of the first 60-year Kalachakra Cycle, the sixteenth of which ended in 1987, the Harmonic Convergence of both the Kalachakra and Quetzalcoatl prophecies—and hence, the commencement of the biosphere-noosphere transition.

As the formal geometrical power of 6, the cube is a pure mental construct, the “crown of creation,” or philosopher's stone. When this cube (6) is added to the biomass constant (73) it yields the noosphere constant of 79. The noosphere is the cosmic cube that crowns creation, represented by the biomass constant. This is a spiritual mental construct that is “added” to the creation, transforming it into the noosphere. $73 + 79 = 152$ or 19×8 , the frequency of kin 152, the Solar Human, the outcome and culminating oracle of the last year of the Mystery of the Stone, the new Homo Noosphericus.

The 79-year interval between the fall and the rise and then the fall again of the world banking system is but a brief and fitful moment in the standards of cosmic history. The 79-year noospheric constant cycle between October 24, 1929, and October 24, 2008 amounts to $= 28835$ days (365×79) + 19 leap days = 28854 days. That is just 54 days more than the number of days in a four-katun cycle.

4 katuns ($7200 \times 4 = 80 \times 360$ -day tuns) = 28800 days. That is the number of the harmonic of polar light (288) multiplied by 100. That is significant because it indicates that the noosphere constant is the function of the harmonic of polar light (288, also the base factor in the mass value of what we call “the God Particle”).

The 79-year interval is precisely 4 katuns plus 54 days. 54 is the frequency of the White Lunar Wizard. Note that White Lunar Wizard and Red Lunar Moon are both gateway kin, separated by 195 kin or fifteen

wavespells. 195 is the frequency of kin 195, Cosmic Eagle, the lost generation when it was the Red Lunar Moon Year, 1994-95. We see here a transfer of power from the White Lunar Wizard, the year preceding the present year of the Blue Electric Storm, the 91st day of which was the Red Lunar Moon.

Of course if we count back 54 days from Red Lunar Moon (kin 249) October 24 to get the precise moment of the four katun cycle completion October 24, 1929 = 28800 days, we arrive at Kin 195, Blue Cosmic Eagle! That date occurred on Lunar Moon 9 (August 31), a new moon. This means that the reference to the G-7 overflowing its banks on the Red Lunar Moon. a prophecy that was received in reference to the Red Lunar Moon year, coded by the lost generation of the Cosmic Eagle, has been truly fulfilled.

In this interpretation of the meaning of the perfect 79-year interval between “black Friday,” October 24, 1929 and “black Friday” October 24 2008, we can see how prophecy is a function of a mathematically structured order of consciousness whose prime method of organization is the matrix of 21 x 21

he 13:20 frequency constitutes recurring sets of cycles; the smallest cycle being the four-day pattern of the harmonics. In this pattern, we see that the 20 solar seals are coded by four colors to create the five sets: red, white, blue, yellow. One set of these is called a harmonic, the four-day cycle that establishes the first pattern of meaning: Red initiates, White refines, Blue transforms, and Yellow ripens. The next pattern is the chromatic (5 units for five-day cycles)—starting and ending with the same color.

The fundamental cycles of the synchronic order are:

4-day cycles

5-day cycles

7-day cycles

13-day cycles

20-day cycles

28-day cycles

Within the 28-day cycles, there are four seven-day sub-cycles. Everything is patterned, organized and harmonized in the seven-day pattern. The seven days are coded by the seven radial plasmas, the psychotelepathic plasmas that govern and organize the sequence of the seven-day cycles.

We are also following a 260-day cycle or galactic spin; there are 73 of these 260-day cycles to every 52 years. There are 73 five-day chromatics to every 52 weeks. There are five 52-day castles to each 260-day spin. In contemplating these cycles, we feel the rich complex of interactions and overlays, or harmonic patterns:

4-day harmonics/time cells,

5-day chromatic,

7-day week (heptad),

13-day wavespell (tones 1-13),

20-day vinal (five harmonics/time cells),

28-day moon,

52-day castle,

65-day galactic season/spectrum,

260-day spin (five castles),

364 + 1 Day Out of Time = 13 Moons.

4-day Harmonics/Time Cells

Smallest fractal cycle. The 20 solar seals are coded by four colors to create the five time cells (4 x 5 = 20).

Each of these sets is called a harmonic with a basic pattern of meaning: red (initiates), white (refines), blue (transforms), yellow (ripens).

HARMONICS

5-day Chromatics

Five day sequence that starts and ends with same color. Each chromatic set has four chromatics each. The chromatics are essentially three types:

1. Clan chromatics,
2. Overtone chromatics
3. Wisdom chromatics.

CLAN CHROMATICS

Clan chromatics define hands, feet, fingers and toes (*human holon*):

Clan chromatics also establish Earth's noospheric grid (*planet holon*):

PLANET HOLON

Chakra	Earth Family		
Crown	Polar		Sound the Chromatics
Throat	Cardinal		Establish the Genesis
Heart	Core		Mine the Tunnels
Solar Plexus	Signal		Unravel the Mystery
Root	Gateway		Open the Portals

OVERTONE CHROMATICS

	YELLOW FLOWERING ELEGANCE	RED UNIVERSAL WATER PROPHECY	WHITE TIMELESSNESS ENDLESSNESS	BLUE SELF-GENERATION ABUNDANCE	
					YEAR BEARERS GATEWAY FAMILY
					SEQUENCE OF 4 DEFINES ONE SEED-STORM YEAR BUNDLE.
					13 YEAR (x4) BUNDLES = 1 52-YEAR SOLAR GALACTIC SIRIUS B CYCLE
					DAY OUT OF TIME SIGNAL FAMILY
					
SEQUENCE OF 4 CHROMATICS = 1 VINAL	CODES YELLOW YEARS	CODES RED YEARS	CODES WHITE YEARS	CODES BLUE YEARS	18 VINALS PER YEAR = 360 + 5-DAY UAYEB

Overtone Chromatics are defined by year-bearers (Gateway Earth family seals: Yellow Seed, Red Moon, White Wizard and Blue Storm); measure the 365-day year as the movement of the *biomass constant*: 73
5-kin Overtone Chromatics = 365-day solar orbit.

WISDOM CHROMATICS

Wisdom chromatics code and define the Wisdom Cycles of Becoming and Return.

52 Becoming + 52 Return = 104 Wisdom Chromatics per cycle.

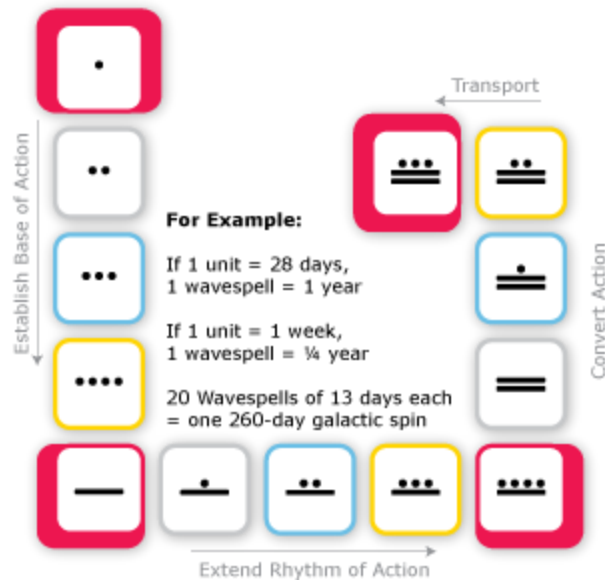

[Click here to download a Chromatics/Harmonics qwik reference.](#)

7-day cycles (week or heptad):

Standard measure. There are four seven-day cycles per moon (4 x 7 = 28). Each day is coded by one of the seven radial plasmas.

13-day cycles (wavespells):

Standard fractal unit of measure. A wavespell can be 13 days, 13 weeks, 13 moons, 13 years, 13 baktuns, etc. There are 20 wavespells of 13 days per 260-day spin ($20 \times 13 = 260$).

20-day cycles (vinals and solar seals):

20-Day Cycles: Vinals

Coded by Red Moon, White Wizard, Blue Storm or Yellow Seed

20-day sequence always coded by the solar seal that codes the year. Creates an annual cycle of solar meditations.

20-Day Cycle: Solar Seals

20-day cycle also refers to 20 solar seals: Dragon to Sun (Harmonic Run)

28-day cycles (moons):

28 is the harmonic standard. $4 \text{ (weeks)} \times 7 \text{ (days)} = 28$. There are 13 moons per year ($28 \times 13 = 364$) +1 (Day out of Time).

52-day cycles (castles):

Each castle consists of four color-coded wavespells ($4 \times 13 = 52$). Five 52-day castles pace each 260-day spin ($52 \times 5 = 260$) Castles are used to map different time ratios: 52 days, 52 years, etc.

65-day cycles (galactic seasons or spectrum):

1	21	41	61	81	101	121	141	161	181	201	221	241
2	22	42	62	82	102	122	142	162	182	202	222	242

65-Day Cycle: Galactic Seasons

shown in 260-day Tzolkin Matrix

There are four 65-day cycles within a 260-day spin. These cycles are coded by the third (electric) tone of the four kin of the polar earth family, i.e. Red Electric Serpent, White Electric Dog, Blue Electric Eagle and Yellow Electric Sun.

260-day cycles (one Tzolkin “spin”):

Fourth-dimensional timing gauge, based on a 13 x 20 matrix, which codes the 13:20 timing frequency.

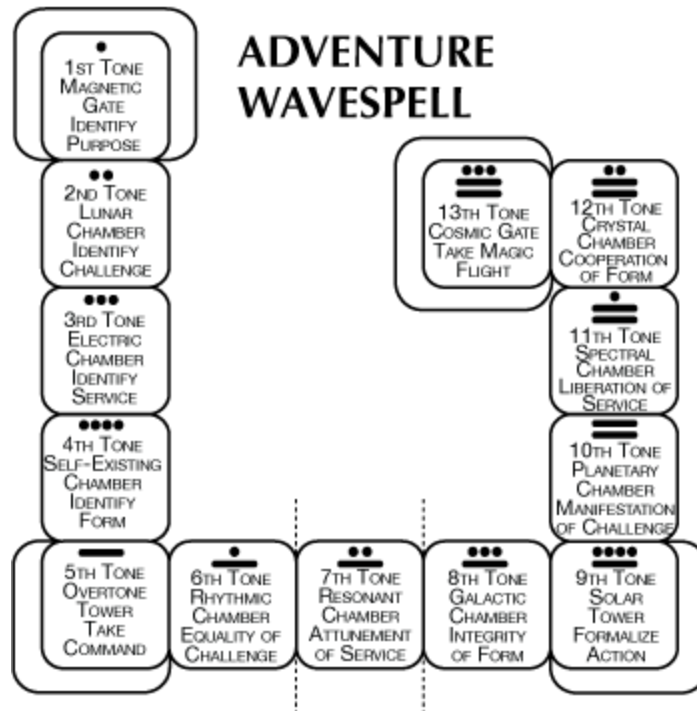

364 + 1 (Day out of Time).

Synchronic Order as Symbolic Construct

The synchronic order is the immediate elaboration of the primal pattern of number as it is projected from mind into time. There is void mind, then there is mind with the primary self-arising qualities of sound, light and fire; then there is mind that logically discriminates and creates a dimension of pure number.

GENERATION OF TIME - 13:20

The Law of Time is made up of primary symbolic constructs, the first being **13 galactic tones**. Each tone or symbol has a unique quality that defines a *wavespell* of time. The **20 solar icons or symbols** describe the movement of space in time. The 13-tone wavespell coordinates the 20 units of the movement of space in time to create a pattern of 260 different symbolic constructs, referred to as *galactic signatures*.

Each of these galactic signatures corresponds to one of the 13 galactic tones or numbers and also to one of the 20 solar seals and one of the four colors. These permutations create 260 possibilities. This is the primary symbolic set of the synchronic order. With their affirmations, the 260 galactic signatures constitute the ***Book of Kin***.

The 20 “solar seals” each have their own fifth force pattern called a *fifth force oracle*. These fifth force oracles combine to create a larger fifth force pattern, which is the fifth force oracle board that shows the coordination of the movement of space in time. This creates a fractally repeating fifth force pattern with its own numerological constructs. These patterns move in time according to shifting color patterns.

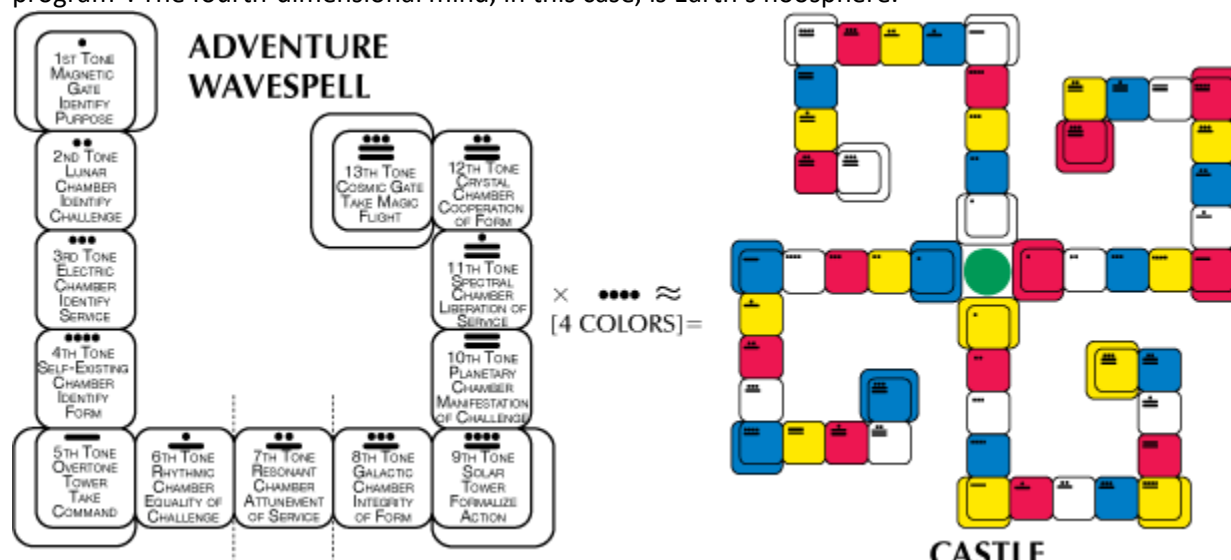

ORACLE BOARD

GENERATION OF SPACE

Everything is a harmony of fractally repeating patterns projected from the fourth-dimensional higher mind. This higher mind receives its imprint from the center of the fifth dimension that projects a specific program into the fourth-dimensional space of the evolving mind of whatever particular point in space might need and be receptive to such a program. The projecting fifth-dimensional mind is the “Sirius B program”. The fourth-dimensional mind, in this case, is Earth’s noosphere.

The 20 seals, with their fifth force oracle patterns, are organized by the wavespell in time to create a *fractally repeating pattern* of 20 wavespells (13 x 20 = 260). These 20 wavespells are contained within five castles; four wavespells per castle, with different colors, directions and functions: the red castle (East), white castle (North), blue castle (West), yellow castle (South) and green castle (Central matrix). There are five harmonics of time with 20 seals, and five castles of time with 20 wavespells. This defines the basic patterns of the synchronic order, but it is well to note that when placed on the boards they create genuinely moving symbolic constructs in time. The fifth force oracle, as well as the journey board can also be folded into a cube.

JOURNEY BOARD

5 CASTLES 20 WAVESPELLS

So this sequence of 260 coded patterns interacts with a sequence of 365 ($364 + 1$) coded days. The $364 + 1$ coded days reduce to the simple pattern of thirteen repeating sets of four seven-day weeks. Each week is based on one of four color patterns. The first week is red, the second white, the third blue and the fourth yellow. Each of the seven days is also coded by one of the radial plasmas. Each of the seven radial plasmas has its pattern, color and meaning that forms the seven-day week into a *heptad* for recapitulating the primal cube of creation.

Even the pattern of the orbit, which we think of as a 365-day cycle, is a construct of 13 sub-cycles—moons—coded by the four colors and seven radial plasmas. These 13 sub-structures, based on the multiplication of four and seven, are coordinated by the wavespell pattern. All the frequencies are resonant with each other and fit into the code and pattern of the annual wavespell, which, again, is a symbolic construct. Just as there are thirteen 28-day moons, there are also 28 thirteen-day wavespells.

HARMONIC STANDARD: PERPETUAL 13 MOON CALENDAR YEAR

There are also four-year harmonic cycles that consist of a set of red, white, blue, and yellow years.

.
—	...	—
...

PRIMAL MATRIX - 9 [4+5]
4×5=20= TOTALITY OF TIMESPACE

If we coordinate the 13 moon/28-day pattern plus the 365th day (Day Out of Time) with the 260-day pattern, we arrive at a cycle of 18,980 days, or 52 years, or 73 of the 260-day patterns. The mentioned cycles are all coordinated by yet another symbolic construct known as the *galactic compass*. *Note that the 52-year solar galactic cycle corresponds to the orbit of Sirius B around Sirius A.*
